

## **GENMED Webinar series #1**

### ***Polygenic Risk Scores: The Shortest Route from Bench to Bedside***

***Professor A. Cecile J.W. Janssens***

***Emory University - Rollins School of Public Health, Atlanta, USA***

***4<sup>th</sup> of February 2021, 4pm – 5.30pm CET***

Drs. Jean-François Deleuze & François Cambien coordinate the Laboratory of Excellence (LabEx) **MEDical GENomics - GENMED**. **GENMED** aims to promote the development of competitive research projects in human diseases both nationally and internationally in the context of Medical Genomics by evaluating, developing and implementing Next Generation Sequencing based technologies and methodologies together with integrated analysis of genomic data. In addition, **GENMED** is involved in education and training initiatives as well as promoting ethical aspects in order to build structural foundations to implement and develop Medical Genomics in France and beyond.

As part of its missions, **GENMED** has to date organized three yearly workshops on Medical Genomics involving internationally renowned speakers. Due to the current Covid-19 pandemic, **GENMED** has decided to replace this popular workshop with a number of online seminars. The first 2021 webinar will be presented by Professor Cecile Janssens from Emory University who will discuss the use of polygenic risk scores in Medical Genomics. The format will be an online 1-hour presentation and 30 minutes of questions/discussion under the guidance of a moderator.
